

Pooya N.

Senior Full-Stack and AI Engineer
Toronto, Canada

SELECTED WORK

Fast websites, online booking and AI assistants for small businesses.

I build things that work on a phone, answer your customers at 11 p.m. and cut repetitive work. I also fix slow or broken sites without a rebuild.

10+ years
building web products, from startup founder to senior engineer

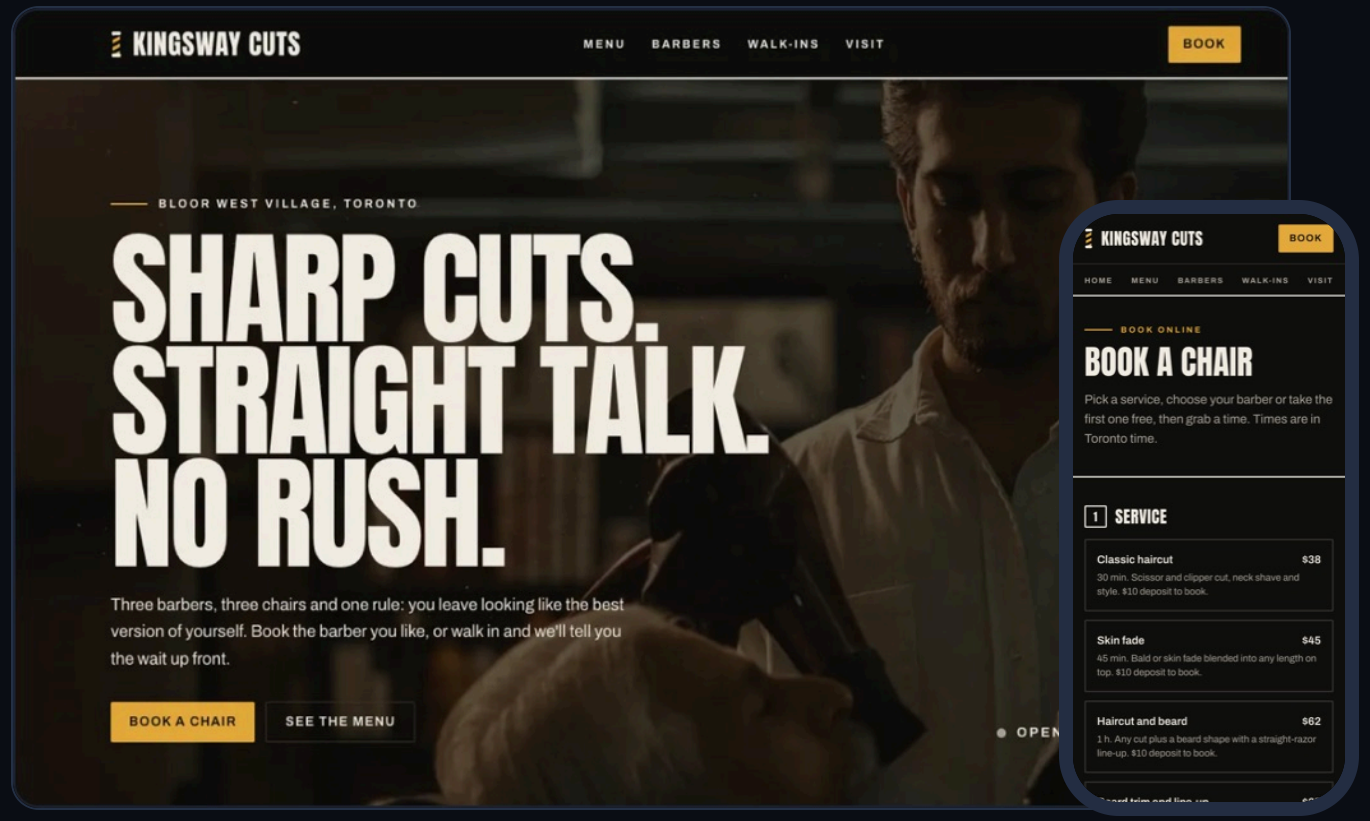

MSc, Computer Science
with 4 peer-reviewed papers on optimization algorithms

AWS Certified
Solutions Architect

Plan, test, ship
written plan, small steps you can test, fixed price

WEBSITES AND ONLINE BOOKING

Customers book at 11 p.m. instead of calling during your busiest hour.

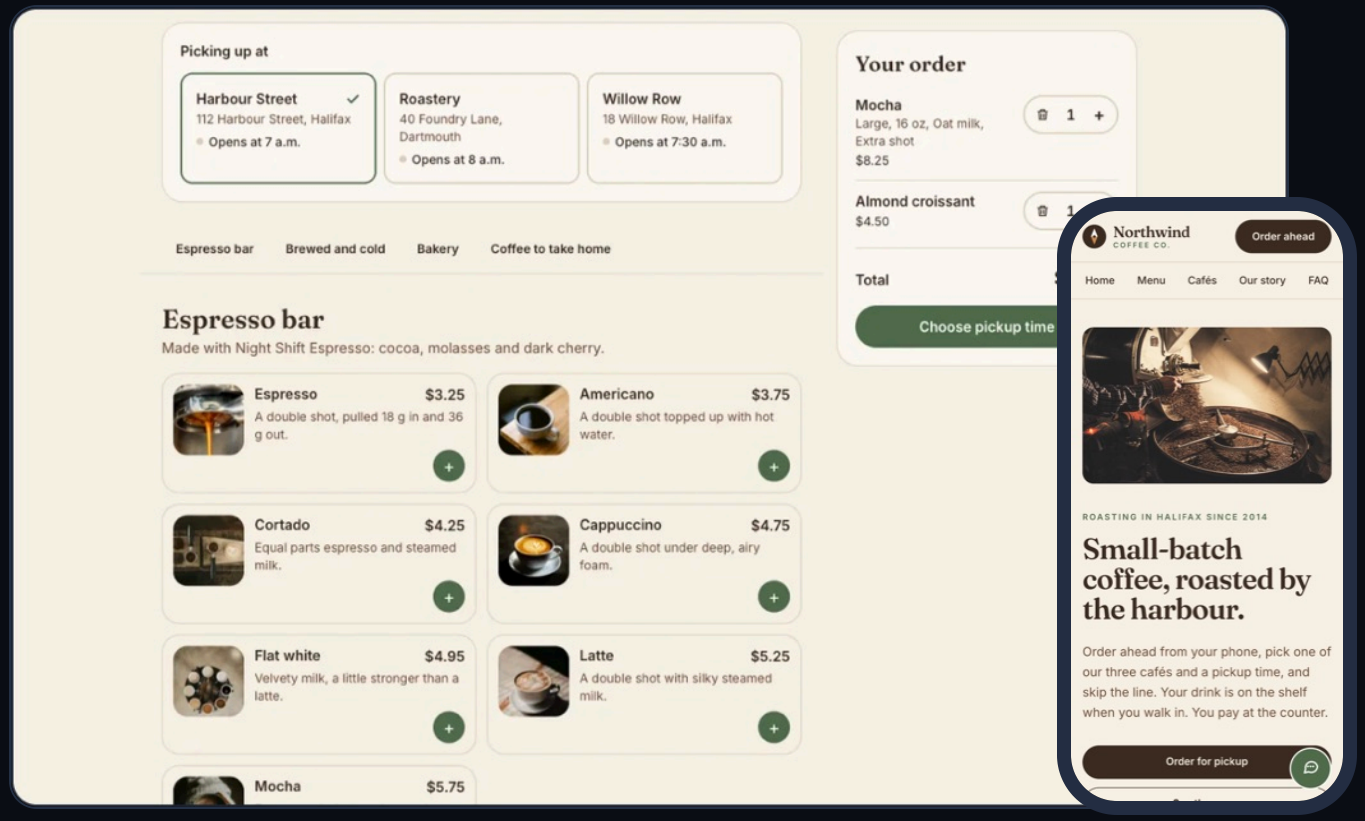

Example: a barbershop website with online booking. See the live demo at pooya.website/work.

- **Online booking with deposits**
  Two people can never take the same slot.
- **Text reminders go out on their own**
  Fewer no-shows without you lifting a finger.
- **An admin that works on your phone**
  Manage chairs, hours and bookings from anywhere.
- **Fast, mobile-first and easy to edit**
  Shows up properly in Google, too.

ONLINE ORDERING

Pickup orders without the phone tag.

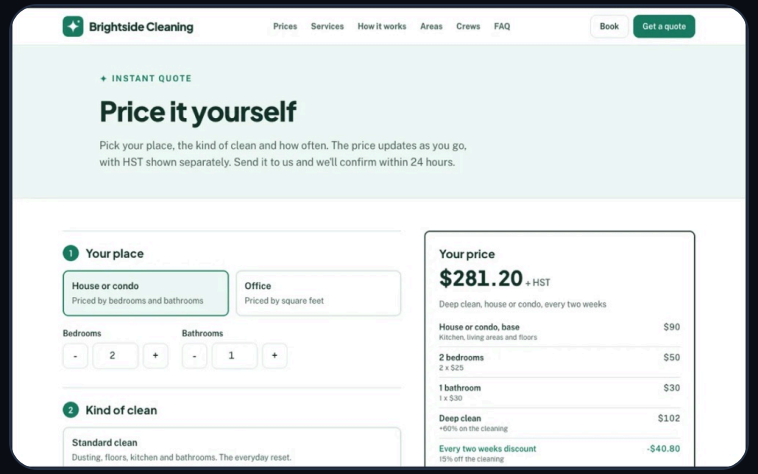

- **Customers pick a location and a pickup time**
  Orders land on a kitchen screen, ready to make.
- **Clear menu, options and live totals**
  Sizes, milk and extras in a few taps.
- **Built for the rush**
  Fast on a phone, easy for staff to run.

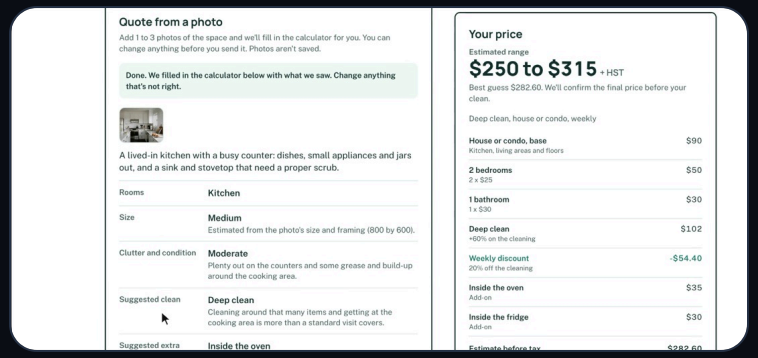

Example: ordering for a cafe with three pickup locations. See the live demo at pooya.website/work.

INSTANT QUOTES

Customers price the job themselves and send it to you.

Instant quote: the price updates as they choose.

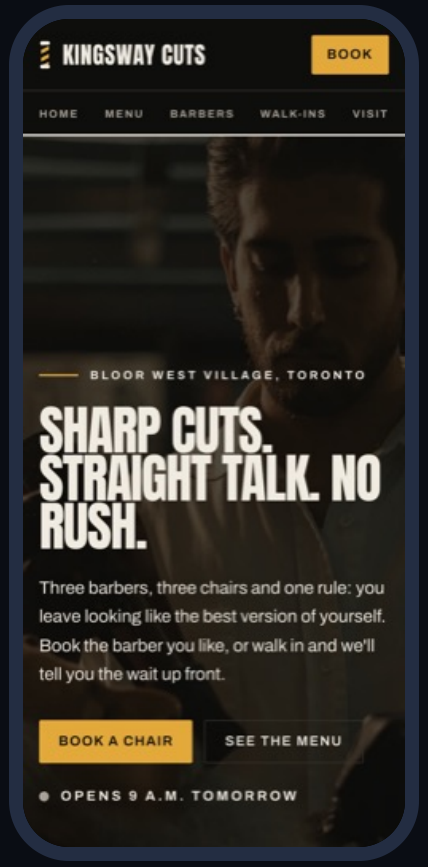

AI photo analysis fills in the rooms and condition. See the live demo at pooya.website/work.

- **The price updates as they choose**
  Every line itemised, taxes shown separately.
- **Your own price list drives every number**
  Rooms, add-ons and repeat discounts you control.
- **Optional AI photo analysis**
  Suggests rooms and condition from photos; the price still comes from your list.

MOBILE FIRST

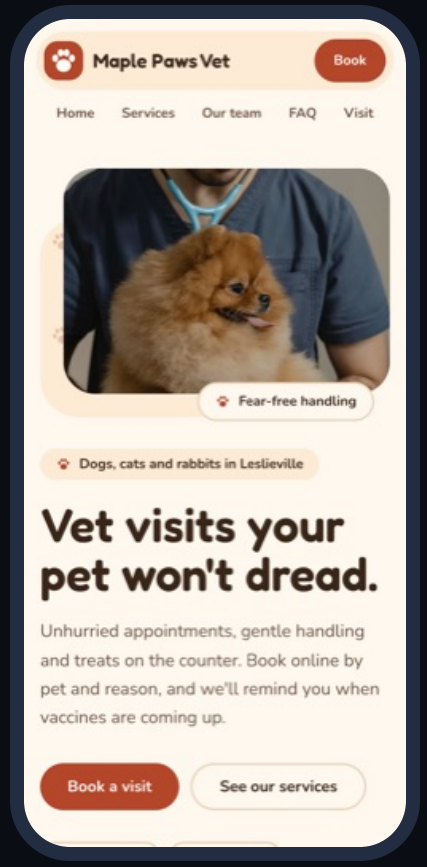

Looks and works right on every phone.

Barbershop

Cafe

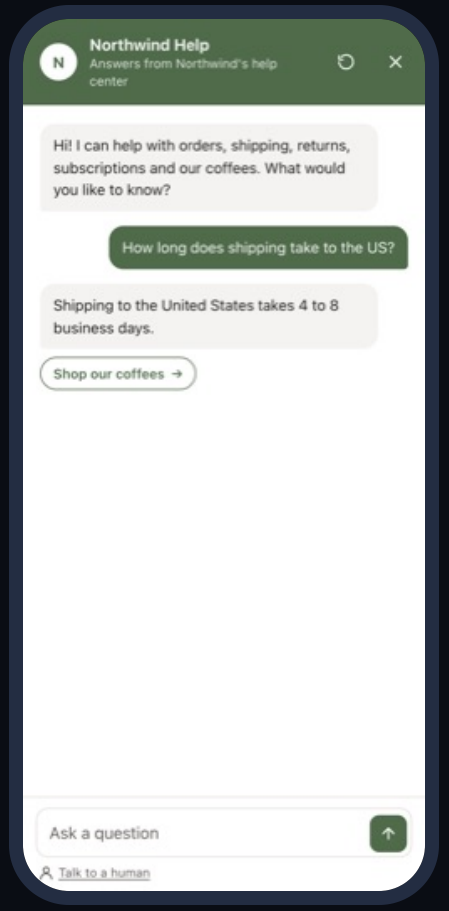

Vet clinic

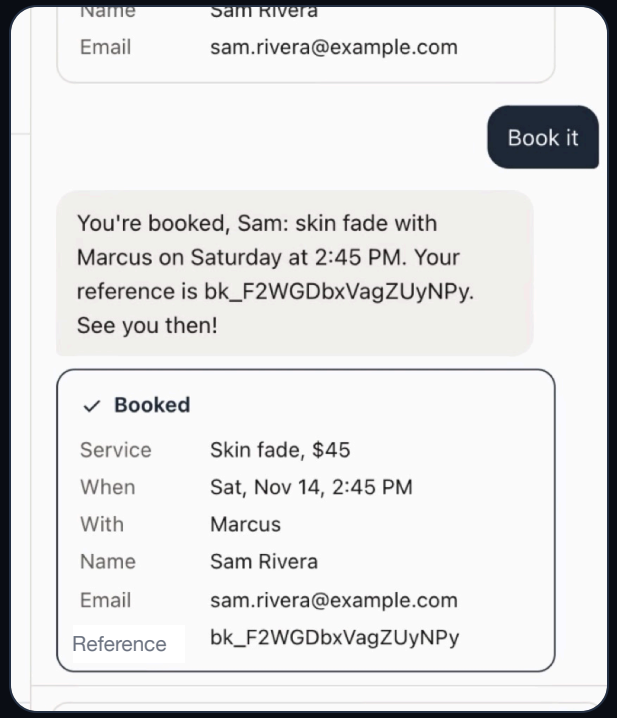

- **Designed for thumbs first**
  Big buttons, readable text, no pinching.
- **Fast on slow connections**
  Light pages that load quickly on mobile data.
- **Same site, every screen**
  Phone, tablet and desktop from one build.

AI SUPPORT ASSISTANT

Answers from your documents, and books visits too.

Answers from your own help documents.

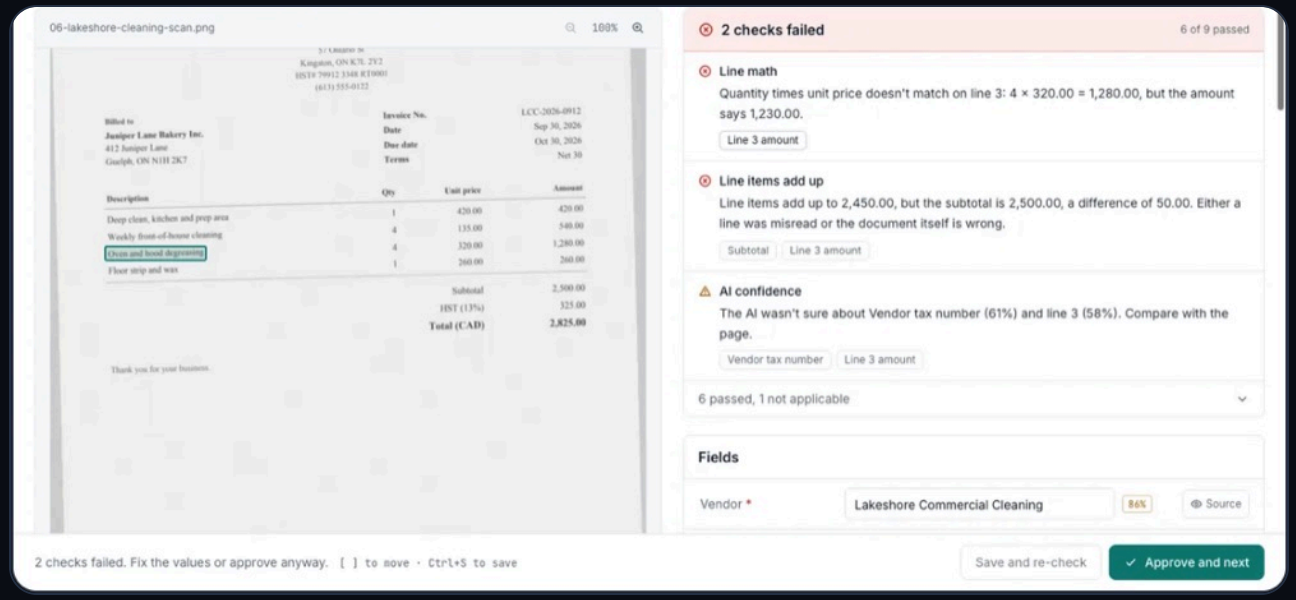

Offers open times, then books the visit.

- **Answers only from your material**
  FAQ pages, price lists, policies, PDFs.
- **Shows the page it used**
  Customers and you can check every answer.
- **Books the visit in the chat**
  Open times as buttons, a confirmation at the end.
- **Hands off to a person when unsure**
  It says so instead of guessing.

PAPERWORK AUTOMATION

Invoices and forms read for you, checked before anything is saved.

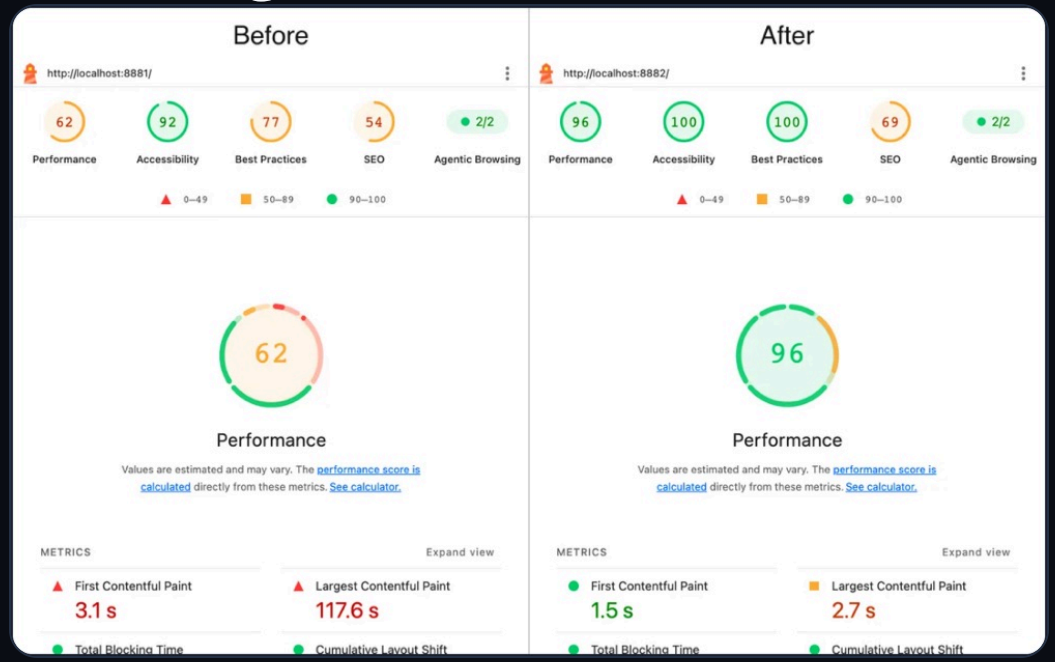

Example: AI reads scanned invoices, then checks the maths. See the live demo at pooya.website/work.

- **Reads scans and PDFs into clean fields**
  Vendor, dates, line items and totals.
- **Catches mistakes automatically**
  Wrong line maths and totals that do not add up.
- **A person approves what it was unsure about**
  Low-confidence fields are flagged for a quick look.

SPEED RESCUE

Faster, lighter and better for SEO: 47 MB to 567 KB, no redesign.

Case study: a slow WordPress site, before and after. More at pooya.website/work.

- **Performance score from 62 to 96**
  Largest paint from 117.6 s to 2.7 s in the test.
- **SEO 54 to 69, best practices 77 to 100**
  Accessibility from 92 to 100 as well.
- **Images, caching and scripts fixed**
  Heavy plugins and apps removed or replaced.

1. PLAN

A short written plan and a fixed price before any work.

2. BUILD

Small steps you can test on your own phone.

3. HANDOVER

Clear notes so you can run it yourself.
